NOTES:

Under Vermont State Law, an interested person may appeal the decision of the Selectboard within 15 days of the date of such decision. **This permit shall not take effect until 15 calendar days after preliminary approval.**

In considering the application for the permit, the Town Road Foreman shall review the application to determine the impact of the proposed development or construction upon highway safety in the affected area.

In granting a permit, the Selectboard may attach conditions thereto in addition to those determined by the Road Foreman including, but not limited to:

- conditions requiring a lessening of the grade of the proposed driveway or highway access road
- requiring grading of other portions of the tract so as to promote proper drainage, and or, visibility along the affected highway
- require posting warning signs at the applicant's expense to promote safety on the affected highway

The Selectboard (or its designated agent) is to be notified when construction of the access road/drive is complete and ready for use so the appropriate final inspection of the development can be scheduled and accomplished.

When the provision of the access permit have been satisfactorily completed, as determined by a final inspection of the development by the Selectboard (or its designated agent) a final approval will be noted on the permit.

General standards for access drive curb cuts are illustrated in Figure 1.
